

Overview for Families, Carers & Support Workers

Membo Noticeboard enables independence and alleviates Carer Overwhelm

- Membo Noticeboard is a digital Noticeboard system that needs the internet to work.
- It includes an App that displays the Noticeboard and an online Hub with additional features
- All people under a Membership use the same account credentials, and view the same Noticeboard on their respective mobile phones and tablets (devices)
- **If there are technological challenges**, once set up, there is no need for a User to touch the device to view the Noticeboard
- Information on the Noticeboard can be updated in real-time in the App and in the online Hub. Access is provided by the Account Holder or other responsible person.
- **The Noticeboard App** displays daily appointments, notes eg answers to recurring questions, & photos on tablets & mobile phones
- Multiple people can install the App, and can be enabled to update the information displayed, or to just view it
- **The Online Hub** has additional important features including one-time setup of recurring appointments, appointment display image, audible alarm, low battery alert for a designated device, and a central place to share notes that don't appear on the Noticeboard
- **Standard Mobile Notifications** can be sent from the Hub for free to any or all Members
- **Support Workers** can be allowed to access the online Family/Team Hub which includes access to member details, device management and other areas. Financial & other secure information is not stored here. If preferred, Support Workers can access Client Noticeboards from the Organisation Hub with direct access ONLY to diaries and notes.
- **Visitor Attendance Notes** from Support Workers and others can be typed from the Noticeboard & sent to the online Hub. They can be viewed in the Hub and with appropriate access, also from within the App. These notes do not remain on the Noticeboard.
- **Noticeboard Settings** apply to each individual device under the Membership. Settings include font size, night light settings, the ability for the Noticeboard to automatically revert to a given display page, and other key features relevant for the individual.
- **Photos** can be uploaded for display and will take over the screen for a short period of time after which the App automatically reverts to the preferred Noticeboard display page.
- **A voice-activated** version of the App is available for people with vision-impairment.
- Cost can be put through all Government support programs NDIS, My Aged Care, CHSP
